

DUNLEVY SOCCER TEAM WINS PRESS LEAGUE CHAMPIONSHIP

Outplays Madison At Every
Stage Of The Game In
Saturday Contest

WINNERS STRONG AT ALL POINTS

For the second consecutive year the Dunlevy soccer team, on Saturday afternoon last, won the big trophy which carried with it the championship of the Press League, and which also gives to each of the players of the team a gold medal emblematic of the honors the team has so handsomely won.

The deciding game in the schedule was played at the Charleroi ball park between Dunlevy and Madison kick-off being scheduled for Saturday afternoon at 3 o'clock. It was a little after that time when Referee James Sherrard blew his whistle for the opening of the game, and then followed a period of ninety minutes of some of the most strenuous soccer playing ever seen on a local field.

Dunlevy won the toss and elected to defend the south goal, thus permitting it to kick toward the best of the field, as the goal it was defending was a quagmire from the rains of the few days previous. The ball was placed in the center of the field with Madison in possession of the ball. Hickey kicked off, and then the battle began. Madison showed a flash in the first few minutes of play, and seven minutes after the opening of hostilities placed a fine goal through Gates, but that was all for Madison. Dunlevy then began a series of plays which completely bewildered their opponents, and the Madison goal was continually in danger. Dunlevy evened the score on a penalty kick, and before the first half of 45 minutes was over had scored another goal.

In the second half, with Dunlevy kicking toward the swampy part of the field, Madison anticipated an easier time, but in this they were mistaken. If anything, Dunlevy played even better ball in mud and water than they did on the dry field. As a matter of fact, there was nothing for the Dunlevy goal keeper to do in this period. He never got a chance to handle the ball, because the Dunlevy forwards were giving Ward the time of his life. Ward is a star goal keeper, and he needed all the skill he possessed to keep the Dunlevy boys from piling up a greater score. As it was they managed to put on through in this half, which made them a total of three goals, which ended the scoring.

Dunlevy demonstrated its superiority over Madison throughout the game and furnished the best offensive game shown on local fields in years. They continually carried the battle to the Madison boys, and in the few times that their own goal was in danger showed exceptional defensive tactics, which made the work of their goal keeper comparatively light. In fact, Gates did not have enough to do to keep him warm.

MAJESTIC TWO DAYS WEDNESDAY AND THURSDAY

Allan Dwan presents through the Majestic "The Forbidden Thing." The story of a faith that would not die.

Mrs. Walter McKinley and Mrs. Grace Cook, who were called to Charleroi last week by the death of their son and brother, Ray Emrick, returned to their home in Trenton City, Ohio, Sunday evening.

HOUSE IS BADLY DAMAGED BY FIRE

The fire department was called out shortly before noon today to answer an alarm sent in from Second street and Washington avenue. The house formerly owned by Samuel Claybaugh but recently purchased by Charles Stroud and occupied by Lewis Jobs was found to be on fire. The fire had apparently started in the basement from the furnace, and had made great headway before being discovered. The fire had eaten its way between the plastering and weather boarding until it reached the attic rooms, and was burning fiercely under the roof when the firemen arrived. It was found necessary to remove a considerable quantity of the furniture and bedding in order to save them from fire and water. During the excitement Mrs. Jobs fainted, and it was necessary to carry her into a neighbor's house and summon a physician. It required an hour's hard work on the part of the firemen before the fire was completely extinguished. The damage will likely amount to several hundred dollars.

TAXI—Anywhere any time. Call Vetter, 424. 179eod

Rev. John R. Barson left this morning for Punxsutawney, to attend the funeral services of Rev. H. G. Teegarden, whose death occurred last Friday evening. The services will be held at the late home of the deceased this afternoon at 2 o'clock, with interment in the Punxsutawney cemetery.

A special meeting of the Lady Maccabees will be held on Tuesday evening at the home of Mrs. Garrigan McKean avenue.

Order of Commander. 183-t1-

Howard Lauderback who underwent an operation at the Charleroi hospital two weeks ago, is recovering as well as can be expected.

24 Hour Taxi Service. Call Vetter. 424. 179eod

Dunlevy is proud of its team, as it has a right to be, and Manager Jack Barrass was complimented over and over again for the fine showing made by his plays. Their footwork was a revelation, and they deserved the honors so decisively won in the crucial game of the season.

Will Abolish 13-Hour Turn At the Three Donora Mills

Announcement has been made that beginning as soon as the necessary changes in organization can be effected, the 13-hour turn at the plants of the American Steel and Wire company at Donora will be abolished. Hereafter shop men employed in department that are not continuous in their operation will work nine hours only.

This move on the part of the corporation is thought to be a retrenchment measure, to curtail expenses at these plants without laying off any of the men, or reducing the hourly wage rate. The supply of labor is now in excess of the demand and but few new men are being placed on the payroll. The mill management has adopted the policy of taking care of their older employees. Cost of production will be cut by reducing the number of hours of labor performed with the hour rate remaining the same as heretofore.

The outlook for general business is considered brighter at the present time than for some months past and there is a growing belief that affairs are soon going to readjust themselves and the country settle down to a period of sane progress and prosperity.

The Donora mills, so far as can be foreseen at this time, will continue to operate at a high percentage of their capacity, and will provide employment for thousands of citizens not only of Donora but for the outlying communities.

GIRLS' TEAM WINS FROM CONNELLSVILLE

The girls' high school basketball team went to Connellsville, last Saturday, and defeated the high school team of that place by a score of 13 to 14, in rather a slow game. Captain Grace Piersol, of the locals, was practically the whole thing, scoring three field goals and registering eleven throws out of nineteen fouls. The other score for Charleroi was made by Miss Sue Provins, by the foul route. For Connellsville, the foul shooting of Miss Penrod was especially fine, as she caged thirteen baskets out of eighteen trials. Miss Michaels scored their only field goal. Efeeree Honsberger did splendid work. The score:

Charleroi—18	Connellsville—14
Piersol	Penrod
Sangston	F
Wilson	C
Provins	G
Phillips-Speers	G
	Long

MUCH INTEREST IN THE CIVIC DINNER

Reservations for the Charleroi Civic dinner on Thursday evening began to come in today. Interest in the event indicates that the attendance will tax the limit of the facilities at the Elks' Club and that it will be one of the notable affairs of the winter in this community.

Dr. George W. Shelton of Pittsburgh will be the chief speaker, it was announced today. Dr. Shelton is no stranger to Charleroi people and those who have heard him will be anxious to again listen, for he is said to be a rapid-fire talker of unusual charm. He has chosen as his topic "Building Cities For Folks to Live In."

WHY SHOULD CHARLEROI HAVE A CHAMBER OF COMMERCE?

LARGE ATTENDANCE AT EVANGELISTIC SERVICES

There were two crowded houses at the evangelistic services on Sunday at the Washington Avenue Presbyterian church. Sunday evening the pastor Rev. John R. Barson, spoke on "Life's Opportunity," and drew a strong picture from Watt's famous painting of the rich young ruler. Then beshowed the artist's picture of "Opportunity" as the young man turned away.

COMPANY EXPLAINS TASTE IN WATER

The Tri-Cities Water company received the following telegram from the State Department of Health at Harrisburg:

Harrisburg, Pa. January 8.—Tri-Cities Water Company, C. C. Humphrie, Chemist, Charleroi, Pa.—Thirty cases typhoid at headwaters of the Monongahela river. Increase hypochloride of lime dose. Operate water works with greatest care.

(Signed) C. A. Emerson, Chief Engineer, Penna. Dept. of Health.

The officials of the Tri-Cities Water Company feel that the public should be taken into our confidence as regards the preceding telegram.

The Hypochloride of lime mentioned in the telegram is the cause of the taste and odor of which there has been some complaint throughout our territory in the last few days, and as we will have to comply with orders with the above telegram, the taste will prevail for sometime in the future, in order to insure our consumers a water free from all pathogenic or disease bearing bacteria.

Following this telegram Mr. L. E. Wickerham, Asst. Engineer of the Penn. State Department of Health paid us a visit of inspection (Sunday Jan. 9th) and after commending our plant highly confirmed the order as contained in their telegram and instructed us to continue to use the amount specified regardless of taste as it is absolutely necessary as a precautionary measure to the good health of our patronage.

An explanation as to the action of Hypochloride of lime when introduced into water is as follows. Peroxide of Hydrogen when poured into an open cut on the hand boils. This is the action of the oxygen of the solution in oxidizing or burning up all of the harmful organism and impurities which may exist in the wound.

This is exactly the same action of Hypochloride of lime when used in water. It oxidizes or burns up all of the harmful bacteria in the water. Hypochloride of lime is absolutely harmless and anyone may feel perfectly safe in drinking any water in which there is a taste of Hypochloride of lime, as it may be taken as a positive indication that there is no bacteria therein. The U. S. Army department used this method for purifying water for their soldiers in the field.

Tri-Cities Water Co.

Several Important Questions Will Be Answered By Series Of Short Articles

NEED OF COMBINED EFFORTS

Among the many questions asked of the men who are active in the expansion of the Charleroi Chamber of Commerce, five seem uppermost in the minds of the citizens. These are:

Why should Charleroi have a Chamber of Commerce?
What will the chamber do?
Who is going to "run" the chamber?
How will the chamber be financed?
What about the permanence of the movement represented by the chamber?

These questions were asked of members of the executive committee, who have prepared answers to them, and express thanks to The Mail for its co-operation in presenting those answers to its readers. The first is published herewith; the others will follow this week.

Why should Charleroi have a Chamber of Commerce?

Every city needs a civic-commercial organization which will bring men and women together to do things the city needs to have done.

This getting together stimulates discussion of the problems of the community; it discovers things to do no one had ever thought of; it puts a united force behind the individual who would like to have things done but knows he cannot do them alone. Discussion of a community's needs naturally leads to finding ways and means of accomplishment.

This is what is meant by the creation and maintaining of a spirit of enterprise in a community. A well-manned, well-planned Chamber of Commerce will provide Charleroi with an organization and the machinery to make use of the best thought and energy of the 400 or more members who will be enlisted next week.

Every man and woman has a fund of time and energy out of which to give to his or her community. Citizens working together every day for a common cause, learn to give.

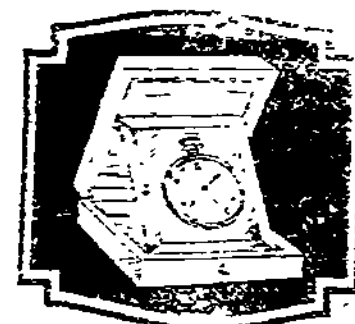

The accomplishments of a well-organized civic-commercial body bring immediate and tangible results to a community and its people. The store-keeper, the factory owner, the physician and lawyer, even the newsboy, sense the usefulness of a good organization working for the community welfare. They know it builds up the business of the city by making it a better place to do business in, and it adds to the population by making it a better place to live in.

Unless the working, professional and business men of today insure the prosperity and advancement of their city a few years hence, their sons and daughters will inevitably go to those other cities which offer great advantages. A well organized Chamber of Commerce is such insurance.

A GREAT RIVER.

Living so close as we do to the Monongahela river, we fail to realize the importance and greatness of this stream in the affairs of the industrial world of the present day. A statement was recently sent out by the United States Engineers' office at Pittsburgh, which said that the traffic on this local stream for 1920 had reached the impressive total of twenty millions of tons, thus bringing to a reality what had been only a hope for a number of years.

People who read about the Panama canal and the Suez canal are impressed with the greatness of these channels of commerce; the story of their construction and the amount of money expended to make available for the use of transportation lines appeals to all, and we look upon them with something like awe, because of the circumstances surrounding their creation.

Here in the Monongahela valley, however, we look upon the river as a matter of course. Conceived and created by nature, we have given little thought to its greatness and importance, and its traffic has not impressed us as anything out of the ordinary. Yet as an artery of commerce it is greater than the Panama and Suez canals combined, and is only second to tonnage to the Great Lakes. On the bosom of our river floats the commerce of an empire, making possible the gigantic industrial operations which give fame to Pittsburgh and all its immediate surroundings. Without the stream these great industrial establishments would never have existed; there may have been steel and iron mills, but not of the capacity and magnitude of those of the present day. The Monongahela river has made them possible, and the stream has given to Western Pennsylvania the unique distinction of having within its borders the greatest commerce stream in the United States. If not the world. We are too close to our river to get a true perspective of its greatness, and only learn through other channels of the important position it holds in the world of commerce.

ASHURST PRESENTED AT COURT

Senator Ashurst, Democrat of Arizona, recently had first-hand experience of that "divinity which doth hedge a king" when he sought an audience with President Wilson to ascertain if and when the mine assessment bill would receive the royal signature. An attendant referred him to Mrs. Wilson. She passed him off on to Joey Tumulty, who was not in and so Ashurst cooled his heels until the royal scribe returned. The only satisfaction Ashurst got out of the occasion was the doubtful one of corroborating for himself what the Republicans have for eight years contended—Woodrow Wilson is as cold and unapproachable as the Grand Lama of Tibet.

RUSSIAN BELLY CAVES IN

Word comes from Russia that steps are being taken toward the demobilization of the soviet army, preparatory to concentration upon the economic ills of the country. That is progress in the right direction. The moment the Russian government suc-

ceeds in establishing itself on a sound economic basis restrictions imposed by other nations on trade with Russia will be removed to the mutual benefit of all concerned.

It is a far cry from present day prescriptions of cold baths to stave off winter attacks of influenza to the first appearance in this country in 1842 of a bath tub—which was objected to by the press as a sign of undemocratic luxury—at a time when bathing itself was regarded by many good citizens as a dangerous habit.

A nine-lived cat is not in it with the widows of pensioners. Revolutionary-war widows have finally ceased to receive government checks, but 71 widows of the war of 1812 are still doing so.

What the numerous "best minds" summoned to Marion had to say might fill a large volume but would hardly make a "best seller," the subject having already been widely discussed during many months.

Truthful Comment.

A merchant recently placed an automatic weighing machine in front of his store. A few days afterward a citizen was observed standing on the machine and closely scrutinizing the dial. His hat was in his hand, although the thermometer marked a low temperature and a passer-by asked him why he had his hat off. "I want to see what I weigh without my outdoor garments," said the citizen blandly. His interlocutor walked away muttering: "He would not weigh much less if he took his head off as well."

When the Ancients Dined.

The ancient Greeks and Romans did not sit up at the table as we do, but reclined round it on couches, three and sometimes even four occupying one couch, at least this latter was the custom among the Romans. Each guest lay flat upon his chest while eating, reaching out his hand from time to time to the table for what he might require. As soon as he had made a sufficient meal he turned over upon his left side, leaning upon the elbow.—Harvard Classics.

Pagoda a Place of Worship.

A pagoda is a Hindu place of worship, containing an idol. It consists of three portions—an apartment surrounded by a dome, resting on columns, and accessible to all; a chamber into which only Brahmins are allowed to enter, and, lastly, a cell containing the statue of the deity, closed by massive gates. The most remarkable pagodas are those of Benares, Simla, Pegu and particularly that of Juggerat in Orissa.

Friends in Charleroi have received cards announcing the marriage of Mrs. Taylor Foreman, formerly of Charleroi and Prof. Ellsworth Smith a high school teacher of Lone Pine, Cal. The ceremony took place in Los Angeles, California, December 26. Mr. and Mrs. Foreman left Charleroi about two years ago, and Mr. Foreman's death occurred a short time after their arrival there.

WEAK NERVES DUE TO SICK GLANDS

Many "Nervous Wrecks" Taking
Animal Gland Treatment
With Splendid Results

Recent scientific discoveries will be of particular interest to the thousands of people suffering from nervous diseases. It has been found that our nervous systems are largely under the control of our ductless glands. When our glands are healthy our nerves are calm and strong. But when our glands become run-down our nerves quickly give away and we soon suffer a nervous breakdown.

The old way of treating nervous complaints was to drug the nerves. In other words it attacked only the symptoms. But now we go to the cause—we build up our run-down ductless glands. And this, it has been found, can be accomplished by feeding them with extracts from the glands of sheep and cattle.

This new method is embodied in a remarkably effective preparation called Glandex Compound, which contains these extracts, also iron and other health builders in tablet form. Many physicians are prescribing this new treatment for their patients, and the results as they report them are truly remarkable. Men and women who for years suffered with various nervous diseases experience decided relief in an amazingly short time. Neurasthenia, however, is not the only ailment for which Glandex Compound can be effectively used. Thousands are taking it for anaemia, old age and its attendant weaknesses, lack of energy and general run-down conditions.

Glandex Compound may be obtained at all druggists and is sold under a money-back guarantee. If it fails to bring entirely satisfactory results in a very few days its purchase price will be refunded. The Glandex Company, Inc., 244 West 29th St., New York City.

GLANDEX
COMPOUND
NEW GLAND TONIC FOR RUN-DOWN PEOPLE

For sale by Piper's Pharmacy and by good druggists everywhere.

YOU NEED IT NOW

Washer Wringer

Only \$5.00 Down then easy Monthly Payments

Has Swinging Wringer and Other
Worthwhile Features

If any electric washing machine feature is worthwhile, the Gainaday has it. The efficiency of washing clothes spotlessly clean in the revolving, reversing Gainaday cylinder is undisputed. Too much evidence points that way—almost a hundred Gainaday owners right here in Charleroi and vicinity is your safeguard. Of great importance, too, is the powerful wringer which wrings the clothes from washer to rinse water to blue water and into the basket, all without moving the machine.

BENJAMIN FRANKLIN, PRINTER

The observance of Franklin's birthday, January 17, is very typical of the man.

He crammed some useful work into every minute of his active life. His birthday is celebrated not with cased shons, but with all the activities of a busy day.

His life and teachings point the way to success through thrift of time and resources. All over the U. S. on Jan. 17, people now observe National Thrift Day.

The world gave him many titles, statesman, philosopher, scientist, inventor, teacher. He chose the most modest of all, printer.

Like Franklin, this Institution leads the way to success, and prosperity through thrift of time and money.

JUNIOR HIGH WINS OVER THE BOY SCOUTS

Saturday night on the high school floor, the Junior High school team defeated the Boy Scouts by the score of 35 to 26, in a fast and interesting game. Sheppard and Filipietz played well for the Juniors, and White for the Scouts.

Score:
JUNIOR HIGH BOY SCOUTS
Sheppard F Collins
Filipietz F White
Schafer C Askison
Torbort G Wheeler
Mason G Richard

Substitutes—Swentson for Mason. Field goals, Sheppard 10, Filipietz 5, Schafer 2; White 5, Askison 3, Collins 3, Wheeler, Richard. Points—Sheppard 1 out of 6, Schafer 1 out of 2, Boy Scouts 2 out of 11. Referee Bruce.

Apple Crop Important
No other fruit crop means so much to the country over as apples do. No other fruit grown in the United States is so universally liked and so needed upon fall winter and spring. A large apple crop is rich in nutritive value and important as a source of sound health. From every point of view, it is good for the whole country.

"Folded Mountains"
The Appalachian mountains are so called because they have been covered by the plications or folds of the rock layers which make up the crust of the earth in this region. Some of the strata of rock have been so folded that they are practically on end or upside down.

One Thing at a Time.
Remember in dealing with most young workers that their minds are like those of children—they do not reason and they must be told only one thing at a time. And that one thing must be told quietly, clearly and without emotion.

Loving One's Enemies.
It is right that man should love those who have offended him. He can do so when he remembers that all men are his relations and that it is through ignorance and misunderstanding that they sin—and then we are all soon—Marcus Aurelius

Mozart a Composer at Five.
Mozart began composing at an earlier age than anybody else on record. At four he was exhibited as an infant prodigy and at five he composed concertos. When he was eleven he wrote an opera bouffe.

Lament for the Past.
Jud Tunkins says he thinks maybe we were better off in the old days when a man didn't dast dress up except on Sunday, for fear of being called a dude.

The Stronger Sex!
No man is so strong or so great that he is not afraid of somebody, and a fine cases out of ten that somebody is a woman.—Hamilton Herald.

So Runs the World Over.
Some get rich quick, more get rich slowly, some must stay poor.—Philadelphia American.

A Fair Average.
The man who accomplishes half the things he intends to do strikes a pretty fair average.—Philadelphia Record

One Sure Thing.
You may kill people but don't kill more.—Boston Transcript.

Cutting Sense.
There comes a clear day when one realizes that clothes are to keep the weather off you, that food is to give you health, that home is shelter and inspiration; that, aside from being clean and well-dressed, one's personal appearance does not signify very much; that the main thing in life is to be going along toward the goal of your ideals. That isn't getting old, it's getting sense. From then on Time is not master, but friend.—Colliers.

Story "Tock Like a Funeral."
The hostess suggested that we each tell a "true" story. When my turn came I was laughing so hard over the joke I wanted to tell that I could scarcely speak. Every one was anxious to hear it, and at last when I had controlled my laughter I began. No one even smiled when I finished. I was the only one who thought the story funny.—Exchange.

The Umbrella's Advent.
The first umbrella ever seen in this country reached Baltimore, a shipment of them coming from England in July, 1770. Hardly any of them found purchasers for quite a while. People laughed at the mollecoddle contrivance, which was not only foolish but unnecessary, inasmuch as rain would not melt anybody.

Not a Bad Description.
Natural history was the subject, and the teacher asked: "Who can tell me what an oyster is?" A shrill voice called out: "An oyster is a fish built like a nut."

Height of Something or Other.
Our idea of the height of something or other is a 200-pound cornfed girl jammed into a tin bathtub that is attached to a motorcycle.—Arkansas Thomas Cat.

Leather in Cow and Horse Hides.
The hide of a cow represents thirty-five pounds of leather, and that of a horse a little more than half that amount.

One Argument Against the H. C. of L.
"Don't charge so much for the coat. Remember, the cheaper it is the less I shall love you."—Klods Hans, Copenhagen.

Notice to the Public

Pepto-Mangan Will Help Fight Colds

Make Up Your Mind to Keep Free
From Colds. Get Your Blood in
Good Condition

START TAKING PEPTO-MANGAN

Now Is the Time to Build Up. You
Will Be Strong This Winter

Every house has a supply of fuel
for winter. People know cold wea-
ther is coming. They get ready
for it.

How many people get their own
bodies ready for winter? Most of
us go around all summer in the in-
tense heat burning up energy, work-

ing hard all day and sometimes ly-
ing awake nights sleepless in the
heat.

Winter comes along. It catches
many people totally unprepared phy-
sically. Few of us take stock of our
health. Whether we will be well,
healthy and strong, we often leave
too much to chance.

But not everybody. Nowadays peo-
ple are learning. They know this
matter of enjoying good health is a
thing they can help control. If you
live right, eat right, get plenty of
sleep, breathe fresh air and keep
your blood in good condition, you
will be all right.

It is so simple. If you feel a lit-
tle off in health—perhaps worn out
and pale—don't take chances. There's
no need of it. Buy some Pepto-
Mangan of your druggist. Begin
taking it today. You can get it in
liquid or tablet form. Tell your
druggist which you prefer. But to

be certain that you get the genuine
Pepto-Mangan; ask for it by the full
name—"Gude's Pepto-Mangan."
Look for the name "Gude's" on the
package. Adve

Perhaps one reason why moral re-
forms receive more legislative at-
tention than industrial reforms is
that they put less of a strain upon
the ordinary intellect.
